DATA ANALYST PROJECTS

Olist E-Commerce Analytics Dashboard — Power BI

- Built a four-page Power BI dashboard on a 100K+ order Brazilian e-commerce dataset (Olist), designing a star schema with 9 source tables and resolving ambiguous/inactive relationship paths.
- Developed 58 DAX measures across Sales, Logistics, and Customer folders, including month-over-month trend indicators on every KPI and a gauge benchmarked against a dynamic target.
- Cleaned data in Power Query — resolved a datetime/date mismatch breaking the Calendar relationship, handled ~610 null product categories, and de-duplicated records to prevent fan-out.

TheLook Ecommerce — SQL & Power BI Dashboard

- Built a four-page Power BI dashboard (Overview, Sales, Customer, Fulfillment) on Google BigQuery's thelook_ecommerce dataset (125K+ orders), designing a star schema across order, product, and user tables.
- Queried the dataset in SQL — JOINS, CTEs, window functions, CASE WHEN — to answer 8 business questions, identifying Search as the top revenue channel (70%+), Blazers & Jackets as the highest-margin category (~52%), and China as the leading market.
- Developed 48 DAX measures across Sales, Fulfillment, and Customer folders, including year-over-year trend indicators on every KPI, and fixed a grain mismatch that was inflating cancellation and return rates.

E-Commerce Data Cleaning & EDA — Pandas & Matplotlib

- Cleaned a messy e-commerce dataset in Pandas — fixed inconsistent text formatting, filled missing unit prices via groupby median per product, and removed duplicates and outliers.
- Performed EDA revealing Mindanao as the top delivery region and Home & Living as the highest revenue category; visualized findings with Matplotlib (order status, revenue by category, delivery performance, payment method).

Personal Finance Dashboard — Excel

- Cleaned a personal finance dataset in Power Query and built XLOOKUP/SUMIF/IF formulas to track monthly budgets, flag overbudget transactions, and compute net savings across spending categories.
- Designed an interactive dark-themed dashboard with KPI cards, PivotCharts, and a Year slicer — revealing expenses consistently exceeded income over time.

COLLEGE PROJECTS

SkillSandbox: Developing an Educational 2D Game for Interactive Learning (Capstone)

2025 – 2026

- Developed a 2D educational Unity game to build job-readiness skills across 3 interactive levels, as UI designer and documentation lead within a group project.
- Designed the in-game UI (3-star scoring display, menu/navigation layout), created background art, and authored capstone documentation covering game design and mechanics.

Christianatea Milktea Shop POS — PHP, HTML/CSS/JS, MySQL

2023 – 2024

- Developed a POS system for a milk tea shop client as sole developer — PHP, HTML, CSS, JavaScript, with user login, CRUD functionality, MySQL database, and stock-level checks.
- Built a receipt management module logging every order, with date-range filtering and export to Excel or PDF.

EXPERIENCE

Research & Development Intern / IT Support / QA · Information Managers Inc — Philippines

Mar 2026 – Jul 2026

- Built a Telegram bot using OpenClaw that delivered BTC, ETH, and SOL prices every 10 minutes alongside the 10-minute price change, plus VOO and QQQ prices at market open and close; researched financial topics (day trading, cryptocurrency), producing structured guides; evaluated and demonstrated 11 AI productivity tools across writing, coding, design, and automation.
- Performed QA testing on a client's software, validating login and add, edit, delete profile functionality.
- Provided IT support including troubleshooting of office cameras, printers, and computers, ensuring minimal downtime.

Customer Service Ops · Cardinal Health International — Philippines

Oct 2025 – Mar 2026

- Audited member profiles for legal/medical accuracy and regulatory compliance while handling sensitive patient and provider records under strict data privacy protocols.

Customer Support Representative · Teleperformance — Philippines

Jul 2023 – Apr 2025

- Delivered voice, email, and chat support for a US/Canadian women's clothing brand, resolving order, return, and billing inquiries within SLA and quality benchmarks.
- Escalated and resolved complex cases with internal teams, contributing to improved satisfaction scores.

EDUCATION

Bachelor of Science in Information Technology

Sep 2022 – Aug 2026

Pateros Technological College — Pateros, Philippines

TECHNICAL SKILLS

Python Pandas · Matplotlib · NumPy · Data Cleaning · Exploratory Data Analysis · Jupyter Notebook

SQL JOINS · CTEs · Window Functions · Aggregation · CASE WHEN · Date Functions · BigQuery

Power BI DAX · Power Query · Data Modeling · Star Schema · Dashboard Design

Excel Power Query · XLOOKUP · Pivot Tables · PivotCharts · Dashboard Design · Data Cleaning

Cloud Platforms AWS (S3, Athena, Glue) · Azure (Blob Storage, Synapse, Data Factory) · GCP (Cloud Storage, BigQuery, Dataflow)

Other PHP · HTML/CSS/JavaScript · XAMPP · MySQL · Unity · C# · UI/UX Design · Git · GitHub

AI Tools Prompt Engineering · AI-Assisted Coding (GitHub Copilot) · Workflow Automation (OpenClaw) · Generative AI Tools (ChatGPT, Claude, Gemini)
